Practical

Our unique combination of quality, durability, competitive pricing, and selection is everything you need to make Prinx Tires your go-to value tier solution.

Prinx Tires is a value tier brand led by a group of renowned industry veterans—and backed by a parent company that owns and operates some of the largest and most modern production facilities in the world. These resources allow us to develop products of the highest quality in a broad range of sizes—at a price point that leaves room for you to make your margin and your customers to meet their budgets.

Prinx stands out in other ways, too. We recognize that, rather than speed, swagger, or adrenaline rushes, today's driver measures performance in getting the kids safely to soccer practice, dependably handling the daily commute, and efficiently delivering packages door-to-door. We fulfill these practical, everyday goals—for practical, everyday drivers.

Finally, Prinx is dedicated to practical performance "for the long haul." This underscores our commitment to building enduring relationships—ones that you and your customers can count on today, and down the road.

We look forward to discussing your business soon. Contact us at info@prinx.us.com

HiSeason 4S

A superior all-weather tire at a value tier price point—in the most popular CUV/SUV and touring fitments.

QUALIFICATIONS

1. All-Weather Optimized

3PMS-rated for superior performance in wet and wintry conditions

2. Advanced Stability

Ladder-shaped grooves between blocks enhance pattern block stiffness, resulting in more driving stability

3. Increased Snow Traction

The integrated "snow tooth" feature in the central grooves actively boosts winter traction

4. Improved Wet Traction

Increased sipe density efficiently cuts into water films to deliver excellent resistance to aquaplaning

5. Extended Lifespan

Symmetric pattern ensures easy tire rotation, extending lifespan and saving on replacements

POPULAR FITMENTS

- Toyota Camry
- Toyota RAV4
- Hyundai Sonata
- Ford Escape
- Lexus ES300

PRINXTIRES 2025 Consumer Tires

All specifications subject to change 5

HiCity

An all-season, premium touring tire at the heart of the Prinx lineup that prioritizes comfort, safety, and value.

QUALIFICATIONS

1. Superb Handling

Asymmetrical tread for enhanced performance and handling

2. Increased Wet Traction

Four wide grooves boost wet traction

3. Wet Braking Optimized

Unique siping improves all-season traction and wet braking

4. Extended Lifespan

Continuous rib design stabilizes and reduces wear

5. Road Noise Resistant

Pattern Noise Simulation (PNS) produces a quieter ride

POPULAR FITMENTS

- Nissan Versa
- Honda CRV
- Kia Forte
- Toyota Corolla
- Ford Escape

HiCity, our most popular tire, delivers the perfect combination of value and practical performance.

All specifications subject to change

HiRace

A precision engineered, all-season, high-performance tire with a sleek, energetic profile.

QUALIFICATIONS

1. Hydroplaning Resistant

Unique asymmetrical tread pattern reduces hydroplaning, enhances wet braking and handling

2. Road Noise Resistant

Pattern Noise Simulation (PNS) produces a quieter ride

3. Increased Durability

Nano Blend Compound maintains performance throughout the life cycle

4. Clearly Labeled Sidewalls

Marked "inside" and "outside" for proper installation

POPULAR FITMENTS

- Ford Mustang
- Tesla Model 3
- Toyota Camry
- Volkswagen Jetta
- Volvo 560

HiRace is an affordable alternative to expensive premium tier tires, that doesn't compromise on quality.

50,000 MILE / 80,000 KM WARRANTY*

* 25,000 Mile / 40,000 KM warranty for staggered fitments

All specifications subject to change

HiCountry H/T

An all-season highway tire for light trucks and SUVs—offering a smooth ride over an extended range.

QUALIFICATIONS

- 1. All-Season Optimized
 - Multiple siping enhances all-season performance and safety
- 2. Increased Wet Traction

Four wide grooves boost wet traction

3. Road Noise Resistant

Pattern Noise Simulation (PNS) produces a quieter ride

4. Material & Temperature Uniformity

Dual steel belt with nylon spiral wrap cap ply for uniformity and heat protection

5. Enhanced Durability

Nano Blend Compound maintains performance throughout the life cycle

POPULAR FITMENTS

- Toyota RAV4
- Ford Expedition
- GMC Acadia
- Kia Sorento
- Nissan Rogue

HiCountry H/T

delivers the perfect combination of value and practical performance.

HiCountry A/T²

The ultimate all-terrain, all-season tire with a bold, new look and fortified sidewall for light trucks and SUVs.

QUALIFICATIONS

1. All-Weather Optimized

3PMS-rated for superior performance in wet and wintry conditions

2. Aggressive Tread Design

Multi-step tread blocks and a larger void ratio than the first gen A/T increases stability and performance

3. Road Noise Resistant

Pattern Noise Simulation (PNS) produces a quieter ride

4. Enhanced Sidewall

Robust sidewall increases durability and protection against punctures in rugged environments

5. OWL Sidewall

Select sizes come with outline white letter styling on one sidewall

* OWL sidewall

All specifications subject to change

HiCountry A/T²

conquers any terrain and is perfect for off-road adventures.

HiCountry R/T

A stout, all-season light truck tire that handles rugged-terrain and provides good mileage performance.

QUALIFICATIONS

1. Increased Stability

Aggressive tread design with multi-step blocks for stability

2. Debris Clearing Capability

Mud rippers and movers help clear debris for traction

3. Snow Stud Ready Studdable using TSMI #15

4. Reinforced Sidewall

Rugged 3-ply sidewall for additional protection from rock and debris

5. Different Sidewall Looks

Alternate sidewall treatments available according to the driver's taste

POPULAR FITMENTS

- Ram 2500
- Jeep Gladiator
- Jeep Wrangler
- Ford Bronco
- Chevy Silverado

HiCountry R/T

features a reinforced, 3-ply sidewall for added protection.

50,000 MILE / 80,000 KM WARRANTY

HiCountry M/T

is purpose-built for off-road adventures, featuring aggressive lugs and a reinforced, 3-ply sidewall for added protection.

PRINX TIRES 2025 Consumer Tires

HiCountry M/T 17

HiFleet

An all-weather tire designed for the demands of delivery vans and commercial light truck fleet vehicles.

QUALIFICATIONS

1. All-Weather Optimized

3PMS-rated for superior performance in wet and wintry conditions

2. Increased Wet Traction

Four wide grooves evacuate water for wet traction

3. Wet Braking Optimized

High-depth sipes enhance driving safety and resist hydroplaning

4. Improved Wear Pattern

Tie-bar linked tread blocks prevent irregular wear

5. Puncture Resistant

Thicker under-tread and reinforced belt prevent punctures

6. Reinforced Sidewall

Strengthened sidewalls utilize a specialized compound that resists damage from curbs and high-scrub use

ALL-WEATHER APPROVED

HiFleet is 3PMS-rated for superior value-tier performance across a mix of rain, heat, and snow.

ST01

A dependable, all-purpose trailer tire with a reinforced sidewall for improved load capacity.

QUALIFICATIONS

For trailer use only

1. Increased Stability

Continuous center rib for better stability and tracking

2. Material & Temperature Uniformity

Nylon spiral wrap for improved uniformity and protection against heat buildup

3. Reinforced Sidewall

Strengthened sidewall construction for improved load capability and durability against curb damage

PRINX TIRES

2025 Limited Passenger Car and Light Truck Tire Warranty for USA and Canada

Effective January 1, 2025, this warranty governs tires purchased from that date onward. Tires obtained before January 1, 2025, fall under the terms of the previous warranty. All warranty claims for PRINX tires must be processed through the original seller or an authorized PRINX tire dealer.

Eligibility

YOU ARE COVERED UNDER THE TERMS OF THIS LIMITED WARRANTY IF:

- You are the original purchaser of new PRINX brand Passenger Car, Light Truck, ST01 or ST02 ST Radial Tires and
- Your tires bear Department of Transportation-prescribed tire identification numbers and are not branded "NA" (Not Adjustable), or "Blem" (Blemish) and
- Your PRINX brand Passenger Car, Light Truck, ST01 or ST02 ST Radial Tires have been used only on the vehicle on which they were originally installed according to the vehicle or tire manufacturer's recommendations and
- Your PRINX brand Passenger Car, Light Truck, ST01 or ST02 ST Radial Tires were purchased from an authorized PRINX tire dealer 3. Ride disturbance after the first 1/32nd (0.8mm) of tread depth as determined by PRINX Chengshan Tire North America. Please note that sellers on online marketplaces such as Amazon.com, Walmart.com, eBay.com, PriorityTires.com, SimpleTire.com are not authorized dealers of PRINX brand tires.

What is covered and for how long?

NO-CHARGE REPLACEMENT

PRINX tires covered by this warranty that become unserviceable due to Road Hazard, or a defect in workmanship or material during the first 2/32nds of usable tread depth will be replaced with a comparable new PRINX tire without charge. The cost of any other service charges, including mounting and balancing, alignment, disposal fees or applicable taxes are payable by you.

PRORATED REPLACEMENT

Tires worn beyond the first 2/32nds of usable tread that become unserviceable due to defects in workmanship or material will be replaced on a prorated basis. You are responsible for the cost of mounting and balancing, along with other service charges, disposal fees, or applicable taxes.

HOW PRORATED CHARGES ARE CALCULATED

The replacement price is determined by multiplying the dealer's current PRINX replacement tire price by the percentage of tread worn from the original tread. Additionally, you are responsible for covering the expenses related to mounting, balancing, and other service charges, disposal fees, or applicable taxes.

WHAT IS A COMPARABLE TIRE?

A "comparable" new PRINX tire may either be the same line of tire or, if the tire is not available, a tire of the same basic construction and

quality with a different sidewall or tread design. If a higher-priced tire is accepted as replacement, the difference in price will be at an additional charge to you. Any replacement tire provided pursuant to this warranty will be covered by the PRINX passenger car and light truck warranty in effect at the time of replacement.

What is not covered by this warranty?

- 1. Tires branded or marked "Non-adjustable (N/A)", or "Blemished (Blem)", or previously adjusted.
- 2. Irregular wear or tire damage due to:
 - a) Road Hazards (including punctures, cuts, snags, impact breaks, etc.) after the first 2/32nds
 - b) Wreck, collision, fire, or vandalism.
 - c) Improper inflation, overloading, misapplication, misuse, negligence, high-speed tire spinning, chain damage, improper mounting or demounting.
 - d) Mechanical condition of the vehicle, including misalignment, wheel imbalance, faulty shocks or brakes.
- or due to damaged wheels. "Ride disturbance" means shakes and bounces of vehicle caused by unbalanced tire- rim-assembly, out of round tires, etc., which bring unpleasant feelings or experience to drivers or passengers. Ride disturbance claims will also not be accepted on 3 or more tires from the same vehicle.
- 4. Cost of Mounting and Balancing.
- 5. Ozone or weather cracking on tires over four (4) years from the date of manufacture.
- 6. Alteration of the tire or addition of alien material or transfer from one vehicle to another.
- 7. Loss of time or use inconvenience, or any incidental or consequential damages.
- 8. Tires used in commercial service unless denoted for such use by the manufacturer.
- 9. Tires used in racing or competitive related events.
- 10. Tires used outside the United States and/or Canada.
- 11. Tires purchased from unauthorized dealers.

When does the warranty end?

When a PRINX brand Passenger Car or Light Truck Tire has delivered its full original tread life down to 2/32nds (1.6mm) remaining at any given spot in the tread area, or five (5) years from the new tire purchase date or seven (7) years from the date of original tire manufacture, whichever comes first. For ST Trailer tires warranty ends after the tire has delivered its full original tread life down to 2/32nds (1.6mm) remaining at any given spot in the tread area, or three (3) years from tire purchase date or five (5) years from the date of manufacturer, whichever comes first.

How do you obtain an adjustment?

In order to be eligible for PRINX Limited Warrenty service, the

- A. Present the tire to an authorized PRINX dealer; and
- B. Present proof of purchase (if applicable) to the dealer.
- C. Complete and sign a PRINX New Tire Warranty Claim Form, which is available at any authorized dealer; and
- D. Pay the amount due on a new tire, less the amount of credit, including taxes, mounting and balancing charges or cost of other services ordered

Disclaimer

This warranty or any warranty stated or referred to herein, is exclusive and in lieu of any other warranty regarding the quality of PRINX brand tires, whether expressed or implied, and remedies for breach thereof shall be limited to those specifically provided herein. To the extent permitted by law, PRINX Chengshan Tire Co. Itd cannot be held responsible for incidental and consequential damages, loss of time, loss of vehicle use, or inconvenience. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This limited warranty applies only to consumers actually purchasing and using the tire in the United States and Canada. Obligations under this policy may not be enlarged or altered by anyone. In Accordance with Federal Law, this limited warranty has been designated as a "Limited Warranty". Nothing in this limited warranty is intended to be a representation that tire failures cannot occur.

This Limited warranty is effective as of January 1, 2025 and replaces any previous limited warranties. Conditions and coverage are subject to change at any time without prior notice.

Proper Tire Inflation and Tire Safety

WARNING

DEATH OR SERIOUS INJURY MAY RESULT FROM:

- A. Tire failure due to underinflation, overinflation and/or overloading.
- B. Explosion of tire/rim assembly due to improper mounting. Only specially trained persons should mount tires.

Proper inflation is critical—inflation pressure enables a tire to support the load and to control the vehicle, therefore proper inflation is critical. With the right amount of inflation pressure, the vehicle and the tires will achieve their optimum performance. In addition to tire safety, this means your tires will wear longer and improve vehicle fuel consumption. Note that some vehicles may have different cold inflation pressures for tires on the front and rear axles. The recommended inflation pressures for tires are typically measured in pounds per square inch (psi) and are indicated on the vehicle tire placard, certification label or in the owner's manual. Underinflation causes excessive heat build-up and internal structural damage that may lead to a tire failure, even at a later date. Overinflation makes it more likely for tires to be cut, punctured or broken by sudden impact. These situations can cause a tire failure, including tread/belt separation, even at a later date, which could lead to an accident and serious personal injury or death.

Tire mounting instructions:

- 1. Only specially trained persons should mount tires. For detailed instructions on mounting passenger and light truck tires, refer to the USTMA wall chart "Demounting and Mounting Procedures for Passenger and Light Truck Tires." Read and understand the procedures and safety warnings before proceeding. Follow installation safety procedures for mounting and inflating tires.
- 2. Always lubricate both beads and rim flanges with approved
- 3. Always match rim diameter with tire diameter. Mount tire only on proper size rim. i.e.: Never mount a 16" tire on a 16.5" rim, it can cause severe injury or death.
- 4. Never inflate a tire that is lying on the floor or other flat surface. Always use a tire mounting machine with a hold down device, safety cage or bolted to the vehicle axle. Use a clip-on air chuck and in-line air valve of gauge.
- 5. Never stand, lean or reach over the tire and rim assembly when inflating.
- 6. Never inflate above 40 psi to seat beads.
- 7. After beads are seated, inflate to or adjust to the vehicle manufacturer's recommended cold inflation pressure.

A more complete guide to Tire Care and Safety as well as proper mounting and demounting procedures is available from the US Tire Manufacturers Association website www.ustires.org/publications or by contacting them at USTMA 1400 K Street, NW, Suite 900 Washington, DC 20005.

PASSENGER/LT LIMITED MILEAGE WARRANTIES

MODEL	MILES	KM
Prinx HiSeason 4S Prinx HiCity Prinx HiRace	70,000 60,000 50,000 / 25,000 staggered	110,000 95,000 80,000 / 40,000 staggered
Prinx HiCountry H/T Prinx Hi Country A/T Prinx HiCountry A/T ² Prinx HiCountry R/T	60,000 metric / 45,000 LT 50,000 metric / 45,000 LT 50,000 50,000	95,000 metric / 70,000 LT 80,000 metric / 70,000 LT 80,000 80,000

Failure to rotate tires every 5,000 miles or according to the vehicle manufacturers instructions voids the treadwear warranty. If tires on a vehicle are different sizes for the front and rear, thus preventing proper rotation, then the mileage warranty will be for half of the warranties stated. Tires used in commercial service have no mileage warranty.

24 PRINXTIRES 2025 Consumer Tires Limited Treadwear Warranty 25

Tire Safety Information: Car Tire Warnings

IMPORTANT: Be sure to read this safety information. Make sure that everyone who services tires or vehicles in your outlet has read and understands these warnings. SERIOUS INJURY OR DEATH CAN RESULT FROM FAILURE TO FOLLOW SAFETY WARNINGS.

No matter how well any tire is constructed, punctures, impact damage, improper inflation, improper maintenance, or service factors may cause serious tire failure creating a risk of property damage and serious or fatal injury to you and/or your customer.

Encourage your customers to examine their tires frequently for snags, bulges, excessive treadwear, separations, or cuts. If such conditions appear, advise them to demount the tire, use the spare, and see you immediately. If you spot any of the above conditions bring them to the customer's attention Immediately. For safety, comply with the following warnings.

Tire and rim servicing can be dangerous and must be done only by trained personnel using proper tools and procedures. Failure to read and comply with all procedures may result in serious injury or death to you or others.

Reinflation of any type of tire/rim assembly that has been operated in a run-flat or underinflated condition (80% or less of recommended pressure) can result In injury or death. The tire may be damaged on the inside and can explode while you are adding air. The rim parts may be worn, damaged or dislodged and can explosively separate.

Use of starting fluid, ether, gasoline, or any other flammable material to lubricate, seal, or seat the beads of a tubeless tire can cause the tire to explode or can cause the explosive separation of the tire rim assembly resulting in serious injury or death. The use of any flammable material during tire servicing is absolutely prohibited.

Any inflated tire mounted on a rim contains explosive energy. The use of damaged, mismatched, or improperly assembled tire/rim pads can cause the assembly to burst apart with explosive force. If you are struck by an exploding tire, rim part, or the air blast, you can be seriously injured or killed.

Re-assembly and the inflation of mismatched parts can result in serious Injury or death. Just because parts come in together does not mean that they belong together. Check for proper matching on rim pans before putting any pads together.

Mismatching tire and rim diameters is dangerous. A mismatched tire and rim assembly may explode and can result in serious injury or death. This warning applies to 14", 14.5", 16", and 15.5" tires and rims as well as similarly mismatched size combinations. Never assemble a tire and rim unless you have identified and correctly matched the parts.

If the tire is below the recommended operating pressure, it must be considered flat. The tire must be removed, dismounted, and inspected for punctures or other damage.

Mounting and Demounting

A tire cannot perform properly unless it is mounted properly on the correct size rim or wheel. The following are general instructions for demounting and mounting tube-type and tubeless tires. For detailed instructions on mounting and demounting truck tires on particular types of rims and wheels, refer to the instructions on the rim and wheel manufacturer or the US Tire Manufacturers Association (USTMA) wall charts.

1. SELECTION OF PROPER COMPONENTS AND MATERIALS:

- All tires must be mounted with the proper tube and flap (if required) and rim or wheel as indicated in the application data books.
- Make certain that rim/wheel components are properly matched and of the correct dimensions for the tire.
- Always fit the new tube in a new mounting. Since the tube will
 exhibit growth in size through normal use, an old tube used in a
 new mounting increases the possibility of tube creasing and
 chafing, possibly resulting in failure.
- Always install a new flap in a new mounting. A flap through extended use becomes hard and brittle. After limited time, it will develop a set to match the tire and rim in which it is fitted. Therefore, it will not exactly match a tire/rim combination.
- Always install new valve cores, and metal or hard plastic valve caps containing plastic or rubber seals. On tubeless truck tire valve seams, replace the rubber grommet. For tires requiring 'O' Rings, be sure to install a new one at every tire change.
- Always use a safety device such as an inflation cage or other OSHA-approved device when inflating.
- Never stand over the tire or in front of a tire when inflating.
- Always use a clip-on valve chuck with hose extension and stand to the side when inflating.

2. TIRE AND RIM LUBRICATION:

It is essential that an approved vegetable oil base soap solution tire lubricant be used for mourning tubeless and tube-type tires. The lubricant serves the following purposes:

- Minimizes the possibility of damage to the tire beads from the mounting tools.
- Eases the insertion of the tire onto the rim by lubricating all contacting surfaces.
- Assists proper bead seating (tire/rim centering) and helps prevent eccentric mountings.

a) TUBELESS TIRES - Apply lubricant to all surfaces of the bead area of the tire. When applying lubricant to the rim, lubricate the entire rim surface from flange to flange.

b) TUBE-TYPE TIRES - Apply clean lubricant to all portions of the tire bead area and the exposed portion of the flap using sufficient but sparing quantities of lubricant. Also lubricate the entire rim surface. Avoid using excessive amounts of lubricant which can become trapped between the tire and tube can resulting in tube damage and rapid air loss.

CAUTION: It is important that tire lubricant be clean and free of dirt, sand, metal shavings or other hard particles. The particles may lodge between the tube and the flap edges, resulting in splits in the tube. The following practice is recommended:

- Use a fresh supply of tire lubricant each day, drawing from a clean supply and placing the lubricant in a clean portable container.
- Provide a cover for the portable container and/or other means to prevent contamination of the lubricant when not in use.

The following method is suggested, which has proven to be successful in minimizing contamination and preventing excess lubricant from entering the tire casing: Provide a special cover for the portable container that has a funnel-like device attached. The small opening of the funnel should be sized so that when a swab is inserted through the opening into the reserved of lubricant and then withdrawn, the swab is compressed, removing excess lubricant. This allows the cover to be left in place, providing added protection. A mesh false bottom in the container is a further safeguard against contaminants. The tire should be mounted and inflated promptly before lubricant dries.

3. PREPARATION OF WHEELS, RIMS, AND TIRES

Never weld or apply heat to a rim or wheel on which a tire is mounted.

- Always wear safety goggles or face shields when buffing or grinding rims or wheels.
- Inspect wheel/rim assemblies for cracks, distortion, deforming of flanges, side rings, lock rings, etc. Using a file and/or emerycloth, smooth all burrs, welds, dents, etc. that are present on the tire side of the rim. Inspect the condition of bolt holes on the wheels.
- Remove rust with a wire brush and apply rust inhibiting paint.
- Remove any accumulation of rubber or grease which might be stuck to the tire, being careful not to damage it. Wipe the beads down with a dry rag.
- Make sure there is no water, dirt or foreign material inside the tire before inserting the tube.

Before servicing any tire rim/wheel assembly

- ALWAYS comply with the procedures in the tire/wheel manufacturer's catalogs, instruction manuals or other industry and government materials.
- Before loosening any nuts or clamps that attach a tube-type tire/ rim assembly to a vehicle, ALWAYS completely deflate the tire (or both tires of a dual assembly) by taking out the valve core(s).
- Use a non-flammable vegetable or soap based rubber lubricant on the beads and rim surfaces to make tire demounting and mounting easier.

- Use proper tools to demount or mount tires and rims (refer to "Typical Tire Service Tools"). NEVER use a steel hammer to seat rim components use only rubber, plastic or brass-tipped mallets. Striking a rim/wheel assembly with a hard-faced hammer can damage the components and endanger the installer. Use a steel duck bill hammer only as a wedge to unseat the beads of tube-type tires. NEVER strike the tire/wheel assembly with a steel duck bill hammer to unseat the beads and do not strike the head of the duck bill hammer with another hard-faced hammer—use a rubber mallet or plastic dead blow hammer. Slide impact tools and hydraulic bead unseating tools can also be used to unseat beads on tube-type tires.
- NEVER inflate any tire that has been operated in a run flat
 or underinflated condition (i.e. operated at 80% or less of
 recommended operating pressure). Demount, inspect and match
 all tire and rim components before reinflating in a restraining
 device with the valve core removed.

Inflating tire rim/wheel assembly

TIRE AND RIM SERVICING CAN BE DANGEROUS AND MUST ONLY BE PERFORMED BY TRAINED PERSONNEL USING PROPER PROCEDURES AND TOOLS. FAILURE TO READ AND COMPLY WITH ALL OF THESE PROCEDURES MAY RESULT IN SERIOUS INJURY OR DEATH TO YOU AND OTHERS.

- NEVER use starter fluid, ether, gasoline, or other flammable
 materials and/or accelerants to lubricate or to seat the beads of a
 tire. This practice can cause the explosive separation of the tire/
 wheel during servicing or during highway use, which may result
 in serious injury or death.
- ALWAYS inflate the tire rim/wheel assembly in a restraining device with the valve core removed. The air line assembly must consist of the following components: a clip-on air chuck, an in-line valve with a pressure gauge or presettable regulator, and sufficient hose length to keep the technician outside the trajectory during inflation. (See 'Trajectory' WARNING below). DO NOT rest or lean any part of your body against the restraining device during inflation. Failure to use a restraining device when inflating a tire/rim wheel assembly is not only a violation of OSHA regulation 1910.177, but also a DANGEROUS PRACTICE that may result in serious injury or death. During inflation, if ANY sidewall undulations or bulges appear or if ANY snapping or cracking or popping noises occur - STOP! DO NOT approach tire. Before removing from restraining device, completely deflate tire remotely. Remove clip-on air chuck. Mark tire as damaged for potential "zipper rupture". Render tire unserviceable, nonrepairable, and scrap.
- NEVER inflate beyond 40 psi to seat any tire beads. NEVER stand, lean, or reach over the tire rim/wheel assembly in the restraining device during inflation. Even if a tire is in a restraining device, inflating beyond 40 psi when trying to seat the beads is a DANGEROUS PRACTICE that may break a tire bead or rim/wheel with explosive force and possibly result in serious injury or death. Demount, inspect, and match all tire and rim components before reinflating in a restraining device with the valve core removed.

Tire Safety Information: Car Tire Warnings 27

Tires on certain globalized ("Euro") Vans

There has been an increase in the variety of vans sold in the North American market that are based on platforms used around the world by vehicle manufacturers. These vans are commonly used in commercial service and come in various sizes and configurations with efficiency and cargo flexibility in mind.

This Tire Information Service Bulletin is a reminder about proper tire replacement guidelines, particularly as it applies to globalized ("Euro") vans and the differences in tire size designations that may be applied to them.

NOTE

Before replacing tires, always refer to and follow the vehicle manufacturer's tire replacement recommendations and restrictions.

Like all other vehicles, when considering tire replacement for Euro vans, carefully determine the tire size designation for the original equipment tires and the recommended replacement tires as specified on the vehicle tire placard, certification label or in the vehicle owner's manual. Depending on the van and it's configuration, it may be equipped with P-Metric, LT-Metric, European Metric (Passenger), or European Commercial Metric tires.

Figures 1 and 2 are examples of placards from one of these increasingly popular model vans. These placards show that European C-Type tires are specified (note the "C" at the end of the tire size code).

FIGURE 1 (Above): Example Vehicle Certification Label

FIGURE 2 (Left): Example Vehicle Tire Placard

Tires with different size designations may not be interchangeable even if they have similar dimensions. For example, an LT metric tire may not be a suitable replacement for a C-Type European Commercial Metric tire, even if the tires have similar section width, aspect ratio, and rim codes. Such tires typically have significantly different load carrying capacities. In other words: An LT225/75R16 is not the same as 225/75R16C.

TIRE TYPE	SIZE CODE	LOAD INDEX & SPEED SYMBOL	LOAD IDENTIFICATION	MAXIMUM LOA AT RATED PRE	
P-Metric (Passenger)	P225/75R16	104T	Standard Load	900 kg	240 kPa
European Metric (Passenger)	225/75R16	104T	Standard Load	900 kg	250 kPa
LT-Metric (Light Truck)	LT225/75R16	115/112R	Load Range E	1215/1120 kg	550 kPa
C-Type European Commercial Metric	225/75R16C	121/120R	Load Range E	1450/1400 kg	575 kPa

NOTI

The "C" at the end of the size designation in Figure 3 below identifies the tire as C-Type European Commercial Metric tire. The "C" is not a load range. The load range is marked separately on the tire sidewall as shown in figure 4.

FIGURE 3: Size and service description of an example C-Type European Commercial Metric Tire

FIGURE 4: Load range, max load and pressure specifications for the example tire shown in Figure 3

MAKE A PLAY

Take advantage of our national sponsorship with the USL.

As the official tire partner of the USL, Prinx Tires is dedicated to high-level performance—and celebrating teams and players that are performing at the highest level.

This unique partnership includes custom content activations, integrated media, in-stadium branding, marquee event dealer activations, and a national fan sweepstakes—all of which are geared to create interest, build buzz, and promote product. Get in touch with questions and ideas about how to make this partnership work for you at info@prinxtireusa.com.

FIND YOUR GROOVE

Sign up for the Prinx Retailer Locator, and reap the rewards.

Practical performance means making it easy for your customers to purchase Prinx. Whether you buy direct from us, or from a distributor around the country, signing up for our retailer locator is the best way for us to send new customers your way.

Scan or contact your sales rep to sign up

- Increased online visibility & SEO
- A convenient resource for customers searching for a retailer
- Gives you a competitive advantage and makes you stand out
- Encourages customers to visit your store

What's a Prinx?

Our name is a little different. But then again, so is our approach to tires. We invite you to follow us—and see "practical performance" in action.

A value-tier tire brand offering "practical performance" to everyday drivers.

The **go-to** alternative to high-priced market leaders and lesser quality low-ballers.

A tire company led by industry **vets** who freely invest in the newest technology.

A group of passionate tire pros who prioritize an easy, informed experience.

A durable and **expansive** line of tires that makes consumers lives easier.

Scan to easily access our social accounts

Dedicated to practical performance for the long haul, Prinx Tires are designed to be your go-to value tier solution.
