ALL-WEATHER

Hi-Season 4S

Features & Benefits

1. 3PMS-rated for superior performance in wet and wintry conditions
2. Ladder-shaped grooves between blocks enhance pattern block stiffness, resulting in more driving stability
3. The integrated "snow tooth" feature in the central grooves actively boosts winter traction
4. Increased sipe density efficiently cuts into water films to deliver excellent resistance to aquaplaning
5. Symmetric pattern ensures easy tire rotation, extending lifespan and saving on replacements

LONG HAUL

PSL1^{ET}

An advanced long haul steer tire that prioritizes sustainability and delivers exceptional performance and efficiency.

Three reasons to run this tire

- Innovative siping and stone ejectors
- Wide footprint for stability
- Decoupler groove eliminates irregular wear

Compares To

- Michelin X Line Energy Z+
- Bridgestone R213 Ecopia
- Goodyear Endurance LHS

LONG HAUL

PSL1^{ET}

Features & Benefits

1. Continuous shoulder rib with decoupling groove promotes even wear and increases mileage over the life of the tire
2. Stone ejector grooves effectively prevent stone drilling—preserving the casing and ensuring maximum retreadability
3. Innovative groove and rib siping improves wet braking and handling
4. Durable casing design delivers dependable performance and long-term cost savings

REGIONAL

AR602^{ET}

A premium 5-rib tire that prioritizes sustainability and is perfect for any regional trucking application.

Three reasons to run this tire

- Designed for regional application
- Special compound to resist scrub
- Stone ejectors

Compares To

- Michelin X Multi Z
- Bridgestone R268 Ecopia
- Goodyear Endurance RSA

REGIONAL

AR602^{ET}

Features & Benefits

1. 5-rib/4-groove design, maximizes evacuation and braking in wet conditions
2. Edge sipes along outside grooves help ensure even treadwear
3. Sipes across the central rib facilitate better grip and help tires run cooler
4. Stone ejector grooves effectively prevent stone drilling—preserving casing integrity and ensuring maximum retreadability
5. Optimized bead bundle provides improved durability and performance

^3-belt Construction

REGIONAL

AR603

A premium 5-rib tire that prioritizes sustainability and is perfect for any regional trucking application.

Three reasons to run this tire

- All-weather highway performance
- Multi-angle grooves for lower road noise
- Shoulder wear indicators helps identify alignment issues

Compares To

- Michelin X Line Energy Z Coach
- Bridgestone R291 Unisteel
- Goodyear G291 Unisteel

PRINX
TIRES

REGIONAL

AR603

Features & Benefits

1. Markings located on the solid shoulders readily identify any vehicle alignment issues
2. Multi-angle grooves contribute to tread rigidity—and combined with optimized rib widths, provide a more uniform wear pattern
3. Specialized siping improves grip with a consistent, regular footprint
4. This tire is 3PMS certified and L-speed rated up to 75 MPH

Drive

LONG HAUL

DH106^{ET}

A durable closed shoulder, drive tire with a deep, modern tread design and remarkable long haul lifespan.

Three reasons to run this tire

- Closed shoulder designed for long mileage
- 30/32nds deep tread drive
- Wide footprint provides stable ride

Compares To

- Michelin X Line Energy D
- Bridgestone M713 Ecopia
- Goodyear Endurance LHD

PRINX
TIRES

LONG HAUL

DH106^{ET}

Features & Benefits

1. Closed shoulder design and deep tread depth of 30/32nds promotes even wear and increases mileage over the life of the tire
2. Stone ejector grooves effectively prevent stone drilling—preserving the casing and ensuring maximum retreadability
3. Specialized tread blocks add stability, grip, and overall durability
4. Optimized siping enhances starts, acceleration, and braking

LONG HAUL

DH131

A closed shoulder drive tire built for regional highway use that prioritizes value and overall dependability.

Three reasons to run this tire

- Lower cost closed shoulder drive option
- Block design for enhanced traction
- Stone ejector grooves protect the casing

Compares To

- Michelin XDA 5+
- Bridgestone M726 ELA
- Goodyear Fuel Max

LONG HAUL

DH131

Features & Benefits

1. Closed shoulder design facilitates high-speed performance, increases mileage, and minimizes wear
2. Specialized tread blocks increase surface area and tire grip
3. Unique siping helps tires run cooler
4. Stone ejector grooves effectively prevent stone drilling—preserving the casing and ensuring maximum retreadability

REGIONAL

DR601^{ET}

An open shoulder drive tire for challenging conditions that require added traction and control.

Three reasons to run this tire

- Designed for high torque applications
- Open shoulder design for extra traction and water dispersion
- 19.5" tires with N speed rating

Compares To

- Michelin X Multi D
- Bridgestone M771 Ecopia
- Goodyear G622 RSD

PRINX
TIRES

REGIONAL

DR601^{ET}

Features & Benefits

1. Open shoulder design, with exposed tread blocks, improves grip along outer edges of the tire
2. Tie-bar linked tread blocks prevent irregular wear
3. Unique siping helps maintain block rigidity and overall integrity of the tire
4. Robust 4-belt construction preserves the casing and ensures maximum retreadability

WINTER DRIVE

PDW1

A premium, winter drive tire built to perform flawlessly in snow and ice across regional highways and roads.

Three reasons to run this tire

- Superior winter and all-weather performance
- Full-depth 3D siping maintains grip as the tire ages
- Enhanced traction and safety

Compares To

- Michelin XDN2
- Bridgestone M771 Ecopia
- Goodyear Fuel Max LHD 2

PRINX
TIRES

WINTER DRIVE

PDW1

Features & Benefits

1. Unique mixture provides enhanced ice and snow performance
2. Three main zigzag grooves and two auxiliary grooves ensure tread stiffness and handling
3. Open shoulder groove design increases the snow removal and anti-sideslip capability of the tire
4. Tie-bar linked tread blocks prevent irregular wear when tires are newer and enhanced, full-depth, 3D siping helps maintain grip as tires age
5. Engineered shoulder block ratio and tread design, combined with high tension steel belts, reduce tread deformation in the footprint leading to better traction

LONG HAUL TRAILER

TH107ET

A dependable, highly efficient, long haul trailer tire that prioritizes stability and consistent performance.

Three reasons to run this tire

- Fuel efficiency and low rolling resistance
- Superior wet traction and stability
- Groove protectors prevent stone drilling

Compares To

- Michelin X Line Energy T2
- Bridgestone R123 Ecopia
- Goodyear Fuel Max LHT

LONG HAUL TRAILER

TH107ET

Features & Benefits

1. Optimized shoulder design improves mileage over the life of the tire
2. Stone ejectors effectively prevent stone drilling—preserving the casing and ensuring maximum retreadability
3. Unique siping helps tires run cooler
4. Optimized footprint for low rolling resistance and even wear
5. 5-rib/4-groove design, maximizes water evacuation and braking in wet conditions

SEVERE SERVICE TRAILER

PTL1

A severe service, spread-axle trailer tire that is engineered for high-scrub, extreme hauling conditions.

Three reasons to run this tire

- Enhanced durability for high-load applications
- Arc shoulder design evenly disperses lateral forces
- Stone ejectors and gradient grooves minimize tread-cap damage compound

Compares To

- Michelin XTE
- Bridgestone R196A
- Goodyear Endurance RST

SEVERE SERVICE TRAILER

PTL1

Features & Benefits

1. Specialized shoulder design disperses lateral forces generated during sharp turning
2. Zigzag grooves improve stability of shoulder pattern blocks and minimize lateral force impact
3. Shoulder groove gradient design improves water dispersion
4. Stone ejectors effectively prevent stone drilling—preserving the casing integrity and ensuring maximum retreadability
5. Big bead filler and high-strength rim cushions handle heavy spread axle loads
